

FOLX Health, Inc. is a new and unique telehealth company that offers virtual care to the queer and trans communities, including hormone replacement therapy, treatment for erectile dysfunction, acne, hair loss, sexually transmitted infections, and sexual health concerns. Mental health care, PrEP, contraception and family planning, and other services are planned for the near future. Currently, FOLX is open in 12 states, and will expand to the remainder of the country in the coming months.

FOLX is looking for physicians and nurse practitioners to join our team to help change what healthcare means for queer and trans folk! Inquiries from clinicians with licenses in all states are welcome, as rapid expansion is anticipated. However, those with licenses in the following states are currently needed: **Ohio, Massachusetts, North Carolina, and Georgia**. We are recruiting clinicians who can offer part-time hours, but full-time expansion may be possible if so desired. Black, Indigenous, people of color, trans, and other gender-expansive clinicians are especially encouraged to consider contributing to the FOLX mission. A short [application form](#) is required, and your CV and cover letter should be sent to [recruiting@folxhealth.com](mailto:recruiting@folxhealth.com).
